

Raccourcis Emmet Visual Studio Code

- Maj : 13/09/23 -

CSS

m10	margin: 10px;
maxh14	max-height: 14px;
dn	display: none;

HTML

! + [ENTER] : produit un squelette de code HTML

ul>li*3>span.hello\$	div#test+p+input
<pre> </pre>	<pre><div id="test"></div> <p></p> <input type="text"></pre>

p*4>lorem --> 4 paragraphes avec du Lorem ipsum	div+div>p>span+em
	<pre><div></div> <div> <p></p> </div></pre>

ID and CLASS

In CSS, you use `elem#id` and `elem.class` notation to reach the elements with specified `id` or `class` attributes. In Emmet, you can use the very same syntax to *add* these attributes to specified element:

div#header+div.page+div#footer.class1.class2.class3

...will output

```
<div id="header"></div>
<div class="page"></div>
<div id="footer" class="class1 class2 class3"></div>
```

Text: {}

You can use curly braces to add text to element:

a{Click me}

...will produce

```
<a href="">Click me</a>
```

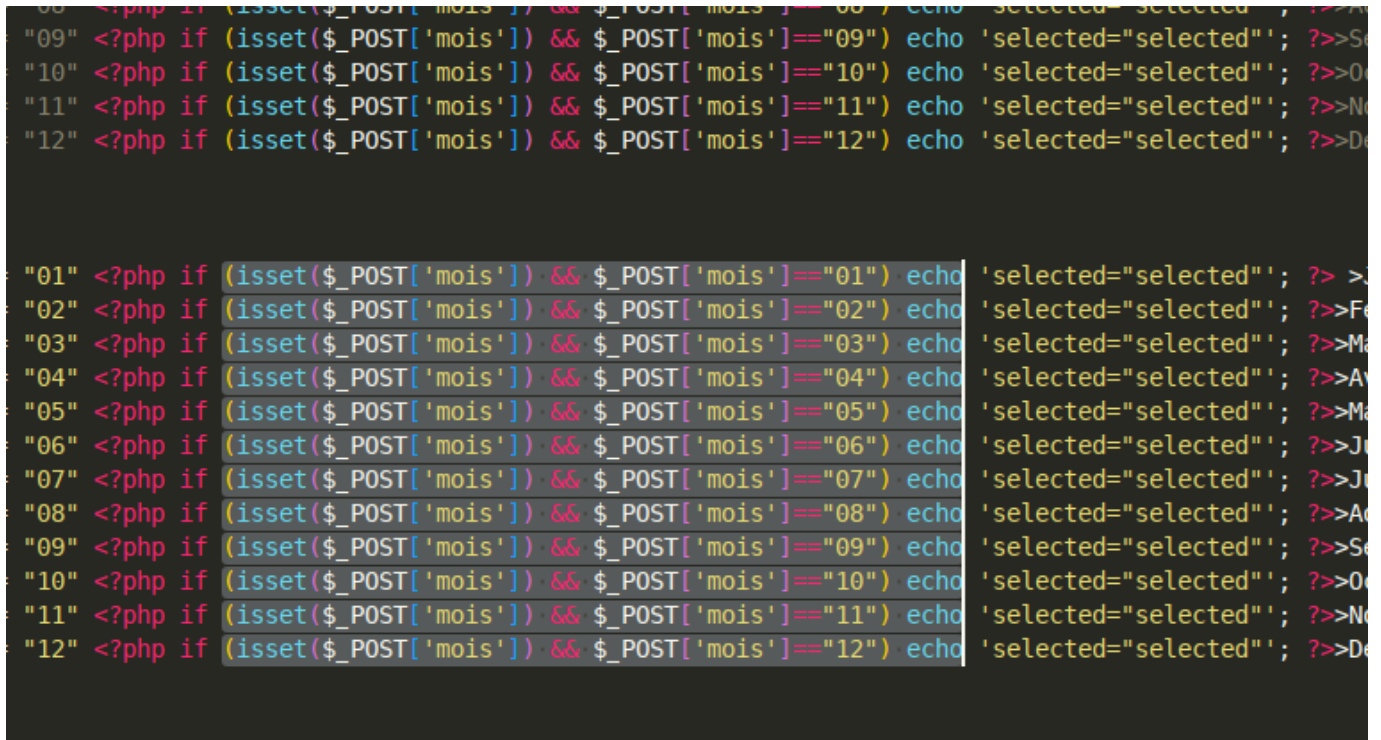

=====

Sélection souris + [CTRL]+D : Sélection multiple pour suppression (éléments identiques)

[Ctrl] + [/] : Commentaires

[Shift] + [Alt] + ↑ : copier/coller à la sauce VSCode

Sélection multi-ligne, en suivant un axe vertical :

A screenshot of a code editor with a dark background. It displays PHP code for a form with 12 months. The code is organized into two sections. The top section contains lines 08 to 12, and the bottom section contains lines 01 to 12. In the bottom section, lines 01 through 11 are selected, indicated by a light blue highlight. A vertical white line is positioned at the end of the first parameter in the 'isset' function across all selected lines, demonstrating vertical selection. The code for each line is: `"01" <?php if (isset($_POST['mois']) && $_POST['mois']=="01") echo 'selected="selected"'; ?> >` (repeated for 02-11), and `"12" <?php if (isset($_POST['mois']) && $_POST['mois']=="12") echo 'selected="selected"'; ?> De`.

- 1) Faire une sélection
- 2) Maintenir [Ctrl][Shift]+[↓] ou [Ctrl][Shift]+[↑]
